

# Hemodynamic Management After Induction : An Analysis of Nurse Anesthetists' Practices

CASE 1 (n=158 respondents)

CASE 2 (n=158 respondents)

A

52-year-old patient with hypertension undergoing minor surgery

=> Low postoperative comorbidity risk

B

85-year-old hypertensive patient with comorbidities undergoing major surgery

=> High postoperative comorbidity risk

## Arterial Pressure Targets

A.1

**MAP = 75,3 +/- 9mmHg**

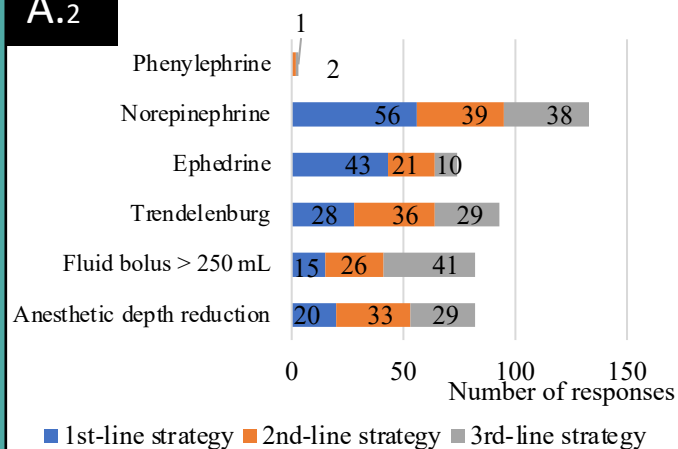

B.1

**MAP = 80,6 +/- 11mmHg**

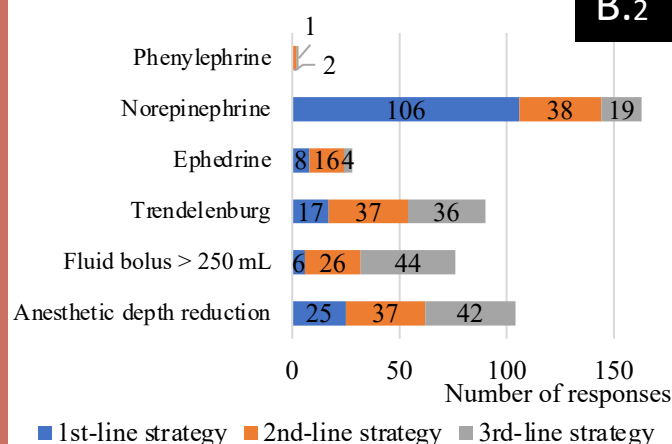

## Hypotension Management Strategy

A.2

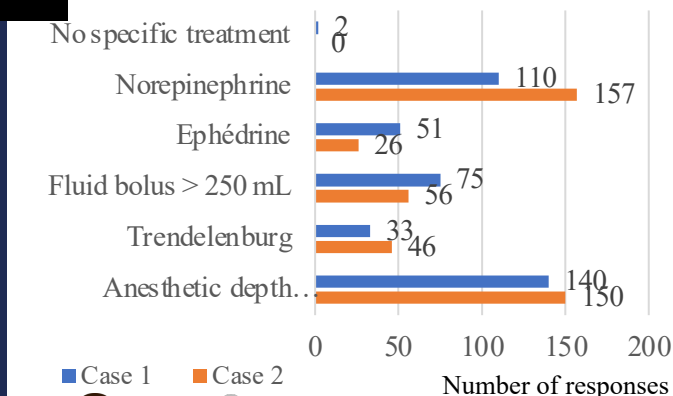

B.2

## Hypotension Prevention Strategy

C

## Implementation and Use of Hemodynamic Monitoring

D
